**Title:** Social Emotional Engagement in Learning

**Description:** Research in social neuroscience fosters our understanding of the development of social and emotional competence in the classroom.

Understanding how social connections fuel our brains to grow and how we, as educators, can consider engagement through a social, emotional and cognitive system, provides us opportunities to socially emotionally engage our learners while insuring access through Universal Design for Learning (UDL) with all learners. The outcome from this session will provide a practical inquiry tool for educators to discover what's working in their practices to enhance learner engagement. We will explore resources from the Social Emotional Engagement Knowledge and Skills (SEE-KS) framework that provide educators with a focus on ensuring learning strategies to promote access, engagement and expression of learning.

**Date:** February 12, 2019

**Time:** 3:30pm-4:00pm EST

**Title:** EMPOWER Future Ready Learners Through The Lens of UDL; Expert Learners

**Description:** Have you ever wanted to integrate your technology in a way that considers where students are in their learning, where they need to be, and permits them to select the pathway to get there? We are living in a digital age where information is just a click away; however, learning should be more than just a Google search. In this webinar we will explore voice and choice with the UDL framework to a personalized playlist for all students.
